

# Comfort Zone

A small size does not mean that the room has to be cramped and unattractive as can be seen in the treatment given to this design, which uses light colours and smart lines to the sanitary ware to make it luxurious.

A dark floor and light walls always help draw out the space and make it look big. This method as also the visual divider on the vertical wall in the form of a border in self colour has been used to give virtual height to the room.

The slashed shape of the mirror, the slim counter top and the use of art work, give this room a well designed and uncramped look.

# Pinstripped Neatness

The use of pinstripes in a pale colour as well as subdued pastels against white, gives this bathroom a smart and formal look, ideal for designs like a business suite.

The bright, yet pastel shades of the door laminates add brightness to the simple decor of the room

The counter top basin and simple, white tiles and the lemon stripes lend it an attractive quality, which does not overpower

Design: Manish Dixit, Aum Architects

Alternating short and broad bands of green, envelope it in the splendour of the colour.

## Freshly Green

Green is a highly unusual colour to use in small spaces. Yet here, it has been used effectively because of the different tones of the colour and also the breaking of it into small sections against a white background.

The quality of lighting and the colour of the floor, gives the bathroom a fresh, green tinge all over.

Design: Manish Dixit, Aum Architects

# Fiesty & Glamourous

Red roses spell romance and luxury in the same breath. Here, the panels have been ingeniously used to create a romantic setting.

The designer washbasin is like the cherry on the cake, adding to the overall beauty of the setting.
